

CURRENT STATUS OF THE CLAIMS

In the Claims

The following is a marked-up version of the claims with the language that is underlined (“ ”) being added and the language that contains strikethrough (“~~—~~”) being deleted:

1. (Previously Presented) A digital image routing system, comprising:
 - means for receiving a digital image packet from a customer that includes a digital image from a digital camera and a customer preference parameter; and
 - means for transmitting the digital image packet to a remote digital image editing system selected according to the customer preference parameter.

2. (Original) The digital image routing system of claim 1, further comprising:
 - means for enhancing the a digital image based on the customer preference parameter; and
 - means for transmitting an enhanced digital image packet that includes a enhanced digital image and an enhancement description packet that describes the enhancements made for each of the digital images.

3. (Original) The digital image routing system of claim 2, wherein the means for enhancing the digital image, includes means for automatically enhancing the digital image based on the customer preference parameter.

4. (Previously Presented) A digital image enhancement system, comprising:
 - means for receiving a digital image packet from a customer that includes a digital image from a digital camera and a customer preference parameter;
 - means for enhancing the digital image based on the customer preference parameter;
 - means for transmitting an enhanced digital image packet that includes an enhanced digital image and an enhancement description packet that describes the enhancements made for each of the digital images; and
 - means for transmitting the digital image packet to a remote digital image editing system selected according to the customer preference parameter.
5. (Original) The digital image enhancement system of claim 4, wherein the means for enhancing the digital image, includes means for automatically enhancing the digital image based on the customer preference parameter.
6. (Canceled)
7. (Previously Presented) A digital image routing method, comprising the steps of:
 - receiving a digital image packet from a customer that includes a digital image from a digital camera and a customer preference parameter; and
 - transmitting the digital image packet to a remote digital image editing system selected according to the customer preference parameter.
8. (Original) The digital image routing method of claim 7, further comprising the steps of:
 - enhancing the digital image based on the customer preference parameter; and
 - transmitting an enhanced digital image packet that includes an enhanced digital image and an enhancement description packet that describes the enhancements made for each of the digital images.

9. (Original) The digital image routing method of claim 7, wherein the step of enhancing the a digital image, includes enhancing the digital image automatically based upon the customer preference parameter.
10. (Original) The digital image routing method of claim 7, further comprising the step of enhancing the digital image automatically using an automatic digital image enhancement system.
11. (Original) The digital image routing method of claim 10, further including the steps of:
 - storing an enhancement performed on a previous digital image;
 - analyzing the enhancement performed on the previous digital image; and
 - establishing the enhancement parameter to be used by the automatic digital image enhancement system to automatically enhance the digital image.
12. (Previously Presented) A digital image enhancement method, comprising the steps of:
 - receiving a digital image packet from a customer that includes a digital image from a digital camera and a customer preference parameter;
 - enhancing the digital image based on the customer preference parameter;
 - transmitting an enhanced digital image packet that includes an enhanced digital image and an enhancement description packet that describes the enhancements made for each of the digital images; and
 - transmitting the digital image packet to a remote digital image editing system selected according to the customer preference parameter.
13. (Original) The digital image enhancement method of claim 12, wherein the step of enhancing the digital image, includes enhancing the digital image automatically based upon the customer preference parameter.
14. (Original) The digital image enhancement method of claim 12, further comprising the step of enhancing the digital image automatically using an automatic digital image enhancement system.

15. (Original) The digital image enhancement method of claim 14, further comprises the steps of:

storing an enhancement performed on a previous digital image;
analyzing the enhancement performed on the previous digital image; and
establishing the enhancement parameter to be used by the automatic digital image enhancement system to automatically enhance the digital image.

16. (Canceled)
